

# Decorative lattices

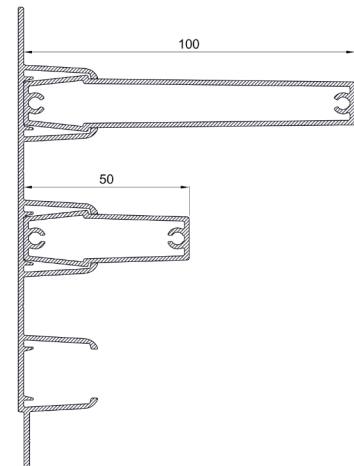

## Clipped louvers

- Louvers system clipped directly to the uprights in three different models.
- It is a grille that is very easy to fit, allowing both ventilation and avoiding direct visualisation.
- Suitable for concealing clotheslines, separating areas or as a ventilation grille.

## Straight louvers

- Louvers system with straight aesthetics with direct fastening system, in 50 mm and 100 mm sizes.
- Thanks to its versatility, it can be used as an aesthetic element or as a ventilation grille.
- Suitable for installation in façades or false ceilings.

### Technical data

Inter-axis	40,8 mm
Ventilation area	58 %

## Panel louvers

- System of panelled slats with different models for facade coverings and false ceilings.
- Easy to assemble thanks to its male-female system on a strip base.
